## - SECURITY -

VOL. DECEMBER  
2021-2022

The development of information and networking technology has generated great benefits to the life of human being. The information and networking security is the important technique to protect the information systems and networks from various malicious cyber-attacks. The information security has been investigated for a quite long period with huge research results, while the security of emerging information systems needs to be further studied. The security of communication networks is another research focus due to the real-time nature of the networks and the development of emerging wired and wireless networks.

# 2022 NISecurity

July 22-24, 2022  
Hangzhou, China  
[www.nisecurity.org](http://www.nisecurity.org)

The conference committee of NISecurity 2022 is excited to invite the authors and scholars from all over the world to submit research papers on the topics of the information and network security to demonstrate their recent novel research progresses and results at the conference. The authors and scholars are encouraged to participate in this significant conference to obtain and exchange new knowledges to promote the advances of the academic research in the field of network and information security.

**2022 International Workshop on Cyber Security**  
**August 19-21 2022 | Hangzhou, China**  
**[www.cybersecurityworkshop.org](http://www.cybersecurityworkshop.org)**

CSW 2022 welcomes researchers, engineers, scientists and industry professionals to an open forum where advances in the field of Cyber Security can be shared and examined. The conference is an ideal platform for keeping up with advances and changes to a consistently morphing field. Leading researchers and industry experts from around the globe will be presenting the latest studies through papers and oral presentations.
