Empowering A Modern & Sustainable World

**VOLUME
MARCH**

Automation

ARTIFICIAL INTELLIGENCE

With the development of science and technology, scenes in the scientific fiction movies no longer seem to be impossible now.

From walking in bare feet to prospective usage of autonomous vehicles, scientists and experts dedicate their lives to boost the evolution of transportation.

In line with the pursuit of those scientific pioneers, IAEIEEE seeks to develop a sustainable future and ensure the continued advancement of our modern world, as it becomes more reliant on electronic, electrical and energy engineering.

SIUSAI 2022

**2022 International Symposium on
Intelligent Unmanned Systems and
Artificial Intelligence**

Seoul, South Korea

May 20-22 2022

SIUSAI 2022 aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results in the field of Unmanned Systems and Artificial Intelligence.

**2022 International
Symposium on Connected
and Autonomous Vehicles**

Seoul, South Korea

May 20-22 2022

SOCAV 2022

The conference aims to provide the platform and opportunities for researchers, scientists, engineers and scholars to exchange and share their new ideas and research in the common theme of Connected and Autonomous Vehicles, and discuss practical issues, the challenges encountered as well as the solutions adopted.
