ICoIEI 2023

The conference will be held virtually from August 11th to 13th, 2023, and we are excited to bring together outstanding scholars, scientific researchers, industry delegates, and policy-makers on a global platform to exchange innovative ideas and tackle the challenges faced by the scientific community of industrial electronics and instrumentation.

As we all know, sharing information and exchanging ideas has never been more important or indispensable. The International Association of Electrical, Electronic and Energy Engineering (IAEEEE) has been working tirelessly to fulfill its commitment to create a unified global platform where scientific researchers, outstanding scholars, industry delegates, and policy-makers can come together to focus on groundbreaking innovations, substantial progress, and the challenges faced by scientific communities in the field of industrial electronics and instrumentation.

The conference is also a great opportunity to reunite with old friends and make new ones during the three-day program after the Covid-19 pandemic. Attendees will undoubtedly leave with informative and stimulating experiences, and, most importantly, contribute to the dissemination of scientific knowledge through presentations, posters, tutorials, and networking activities.

SECCE 2023

2023 International Symposium on Electronics, Communications and Control Engineering

Introduction

It is a great pleasure for us to welcome you to the 2023 International Symposium on Electronics, Communications and Control Engineering (SECCE 2023). It is an extraordinary occasion for our participants and scholars. SECCE 2023 will be held virtually during August 11-13, 2023.

The multidisciplinary scientific process has improved a lot nowadays. Those various descriptions which used multidisciplinary methods to promote the discovering of electronics, communications and control engineering showed well the importance of collaborations among different fields, research teams. With the above theme, SECCE 2023 aspires to keep up with advances and changes to a consistently morphing field. Leading researchers and industry experts from around the globe will be presenting the latest studies on this conference.

Conference Chairs

Xiongwen Zhao
North China Electric Power
University
China

Massimo Marchiori
University of Padua
Italy

Zhiyong Luo
Sun Yat-sen University
China

Conference Co-chairs

Debiao Meng
University of Electronic Science
and Technology of China
China

Xizheng Ke
Xi'an University of Technology
