The International Association of Electrical,
Electronic and Energy Engineering

# Content

The International Association of Electrical, Electronic and Energy Engineering (IAEEEE) is an international, scientific and educational organization. IAEEEE developed a diverse membership composed of engineers, scientists, administrators, and educators representing corporations, educational institutions, and government agencies. IAEEEE seeks to develop a sustainable future and ensure the continued advancement of our modern world, as it becomes more reliant on electronic, electrical and energy engineering.

#### 2023 International Conference on Smart Cities and Smart Grid

2023 International Conference on Smart Cities and Smart Grid (CSCSG 2023) will be held in Changsha, China during September 15-17, 2023.

The 2023 International Conference on Smart Cities and Smart Grid (CSCSG 2023) will bring together leading academic scientists, researchers, leading companies and delegates from across the globe to present the most forward-thinking innovations that are transforming the way we live. With the rollout of 5G, the Smart City of the future becomes a realistic vision. The conference will provide a premier interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of smart city. In addition, CSCSG 2023 will aim to provide a forum for researchers and practitioners from academia, industry, government institutions, and regulators with background in communications, energy, control, signal processing, analytics and information systems to exchange ideas, explore enabling technologies and share experiences related to smart grids. We welcome you to join us for an exciting program during September 2023 and we hope that with its high quality, this conference will provide an exceptional value for students, academics and industry researchers.

## 2023 International Conference on Cyber Physical Systems and IoT

Welcome to the official website of the 2023 International Conference on Cyber Physical Systems and IoT(CPSIOT 2023), which will be held in Changsha, China during September 15-17, 2023.

**Participants** from many universities, research institutes and enterprises worldwide have made important progress in research cooperation and exchange of ideas in the field of Cyber-Physical Systems and IoT from last year's conference. The conference will also adhere to the consistent commitment, to provide a platform where the latest achievements in the field of Cyber-Physical Systems and IoT can be shared and examined.

The conference subject encompasses disciplines in Control systems, Data mining, Deep learning, Industry 4.0, IoT Interactions, etc. For more relevant conference topics, please refer to <u>CFP</u> page.
